

2022 Mapping improvement possibilities

Assessing the environmental aspects

Setting targets to become a carbon neutral airport and updating our environmental plan

Carbon optimising requirements added to investments and agreements

Mapping energy usage and heat production optimisation possibilities and implementing it

Mapping possibilities to renew our equipment park

Switch from gas to district heating

Raising awareness inside the organisation and our partners

Investing in alternate energy production to increase usage of alternate energy

Building additional solar parks

Implementing waste management according to our carbon neutrality commitment

Optimising processes according to our carbon neutrality commitment

Continue renewing our infrastructure according to our carbon neutrality commitment

Optimising staff carbon footprint

Raising travellers awareness and promoting carbon footprint

Continue investing in alternative energy production to increase usage of alternative energy to 100%

Continuing to renew our equipment park and finding more sustainable solutions to improve ground Handling processes

Continuous carbon optimisation

2025 Carbon neutrality

Becoming a carbon neutral airport
